

DIM L-41 ©

DIM L-41
Fe-Ni alloy

Characteristics

Stainless, elastic, crack free,
different raw materials,
heat resistant,
Elongation: up to 30%
> 200 HB

Fields of application

Grey cast irons (GG)
Spheroidal graphite iron (GGG)
Ductile centrifugal casting
Cast iron with vermiluar graphite (GJV)
Oldtimer parts such as:
guttet manifolds
cracks on steels and high alloyed engine block cracks
Mixed joints steel-copper-nickel among themselves and cast steel

Chemical composition

C	Mn	Ni	Ti	Fe
0,1	3,5	55,0	0,5	Rest
